

BJN

British Journal of Nursing

THE ESSENTIAL CLINICAL JOURNAL FOR ALL NURSES

MA HEALTHCARE

A MARK ALLEN GROUP COMPANY

Contact your NHS Library for full details and help with access

ESSENTIAL FEATURES

ORIGINAL RESEARCH

High-quality, peer-reviewed research covering every specialism, so you are up-to-date with developments from across the field and prepared for any eventuality.

BEST PRACTICE

Clinical articles and case studies written by expert practitioners, designed to help you enhance your practice and raise standards of care.

PROFESSIONAL ISSUES

There is more to nursing than meets the eye. We provide expert advice on all aspects of the job, from critical care to management.

PATIENT SAFETY

In-depth analysis on how to meet the needs of individual patients, to guide your clinical decision-making and improve outcomes for your patients.

SUPPLEMENTS

17 annual supplements focusing on a different speciality, including: tissue viability, stoma care, urology, IV therapy and oncology.

BJN is an outstanding journal that supports nurses within practice to maintain and develop excellence in care. From my perspective, students at all levels of development, from undergraduate to post-grad and PHD level studies, find the text accessible, informative and cutting edge. Dealing with a broad range of clinical and managerial topics, **BJN** is the 'go to' journal for many nurses in practice.

**Karen Wild, Senior Lecturer,
Student Opportunity Lead,
Admissions Tutor, Adult BSc and MA,
School of Nursing, Midwifery, Social Work
and Social Sciences**

British Journal of Nursing (BJN) is the only fortnightly clinical journal for nurses and has been described as *'the most clinically-focused journal available'*.

With cutting-edge, peer-reviewed research covering all aspects of nursing, **BJN** encourages best practice and your ongoing professional and educational development.
