

# The **one journal** that provides the clinical evidence about wound care

A MARK ALLEN GROUP COMPANY

A thumbnail image of the journal cover for the 'Antibiofilm properties of Costa Rican stingless bee honeys' article. The cover features the JWC logo, the journal title, and a photograph of a bee on a flower. A 'MEDLINE LISTED' badge is visible in the bottom right corner of the thumbnail.

**J W C**  
journal of wound care  
*Official journal of the World Union of Wound Healing Societies*

**Antibiofilm properties of Costa Rican stingless bee honeys**

A chitosan dressing with silver in the management of paediatric burn wounds  
Accuracy of visual diagnosis of tinea pedis and tinea unguium in aged care facilities  
Cost-of-illness studies in chronic ulcers: a systematic review  
Identifying, managing and preventing skin maceration: the clinical evidence

# ESSENTIAL FEATURES

## ORIGINAL RESEARCH

High-quality, peer-reviewed research that covers all aspects of wound care, including leg ulcers, pressure care, the diabetic foot, burns, biofilms, and more.

## EVIDENCE-BASED PRACTICE

Practical articles and clinical case studies that provide critical information on how to treat complex wounds.

## INNOVATIONS IN WOUND CARE

Focus on clinical trials of potential new treatments to keep practitioners ahead of the latest developments worldwide.

## IN-DEPTH PROSPECTIVE STUDIES

Comparative studies of the best available treatment applications, using high-level research evidence on new and existing treatments.

## COMPREHENSIVE LITERATURE REVIEWS

Expert insights into current concepts and practice, including cost-effectiveness, symptom management, and the patient experience.

The **JWC** is an indispensable go-to source that sits squarely at the intersection of outcomes-based research and pragmatic clinical care.

David G. Armstrong, DPM, MD, PhD,  
Professor of Surgery and Director, Southern Arizona  
Limb Salvage Alliance (SALSA),  
University of Arizona College of Medicine, USA

*Journal of Wound Care (JWC)* provides the latest evidence-based information and best practice procedures, covering the full spectrum of wound care, including the prevention and treatment of wounds and associated skin conditions. All articles are peer-reviewed by an expert panel of advisors and reviewers, and include the latest state-of-the-art research and clinical practice.
